

Pro Logistics SAL

YOUR TOTAL WAREHOUSING SOLUTION PARTNER

ABOUT **PROLOGISTICS**

PROLOGISTICS is a premier third-party logistics (3PL) provider, offering comprehensive, end-to-end logistics solutions tailored to businesses of all sizes across diverse industries.

Our state-of-the-art Class A distribution center is built to international standards, designed to support high-volume, multi-temperature supply chains with efficiency and precision. With dedicated inbound and outbound zones, our layout ensures optimal throughput and streamlined operations.

In addition to advanced storage solutions, PROLOGISTICS offers a wide range of Value-Added Services (VAS) including labeling, co-packing, and kitting. Our fleet enables agile and reliable local distribution across Lebanon, ensuring full supply chain integration.

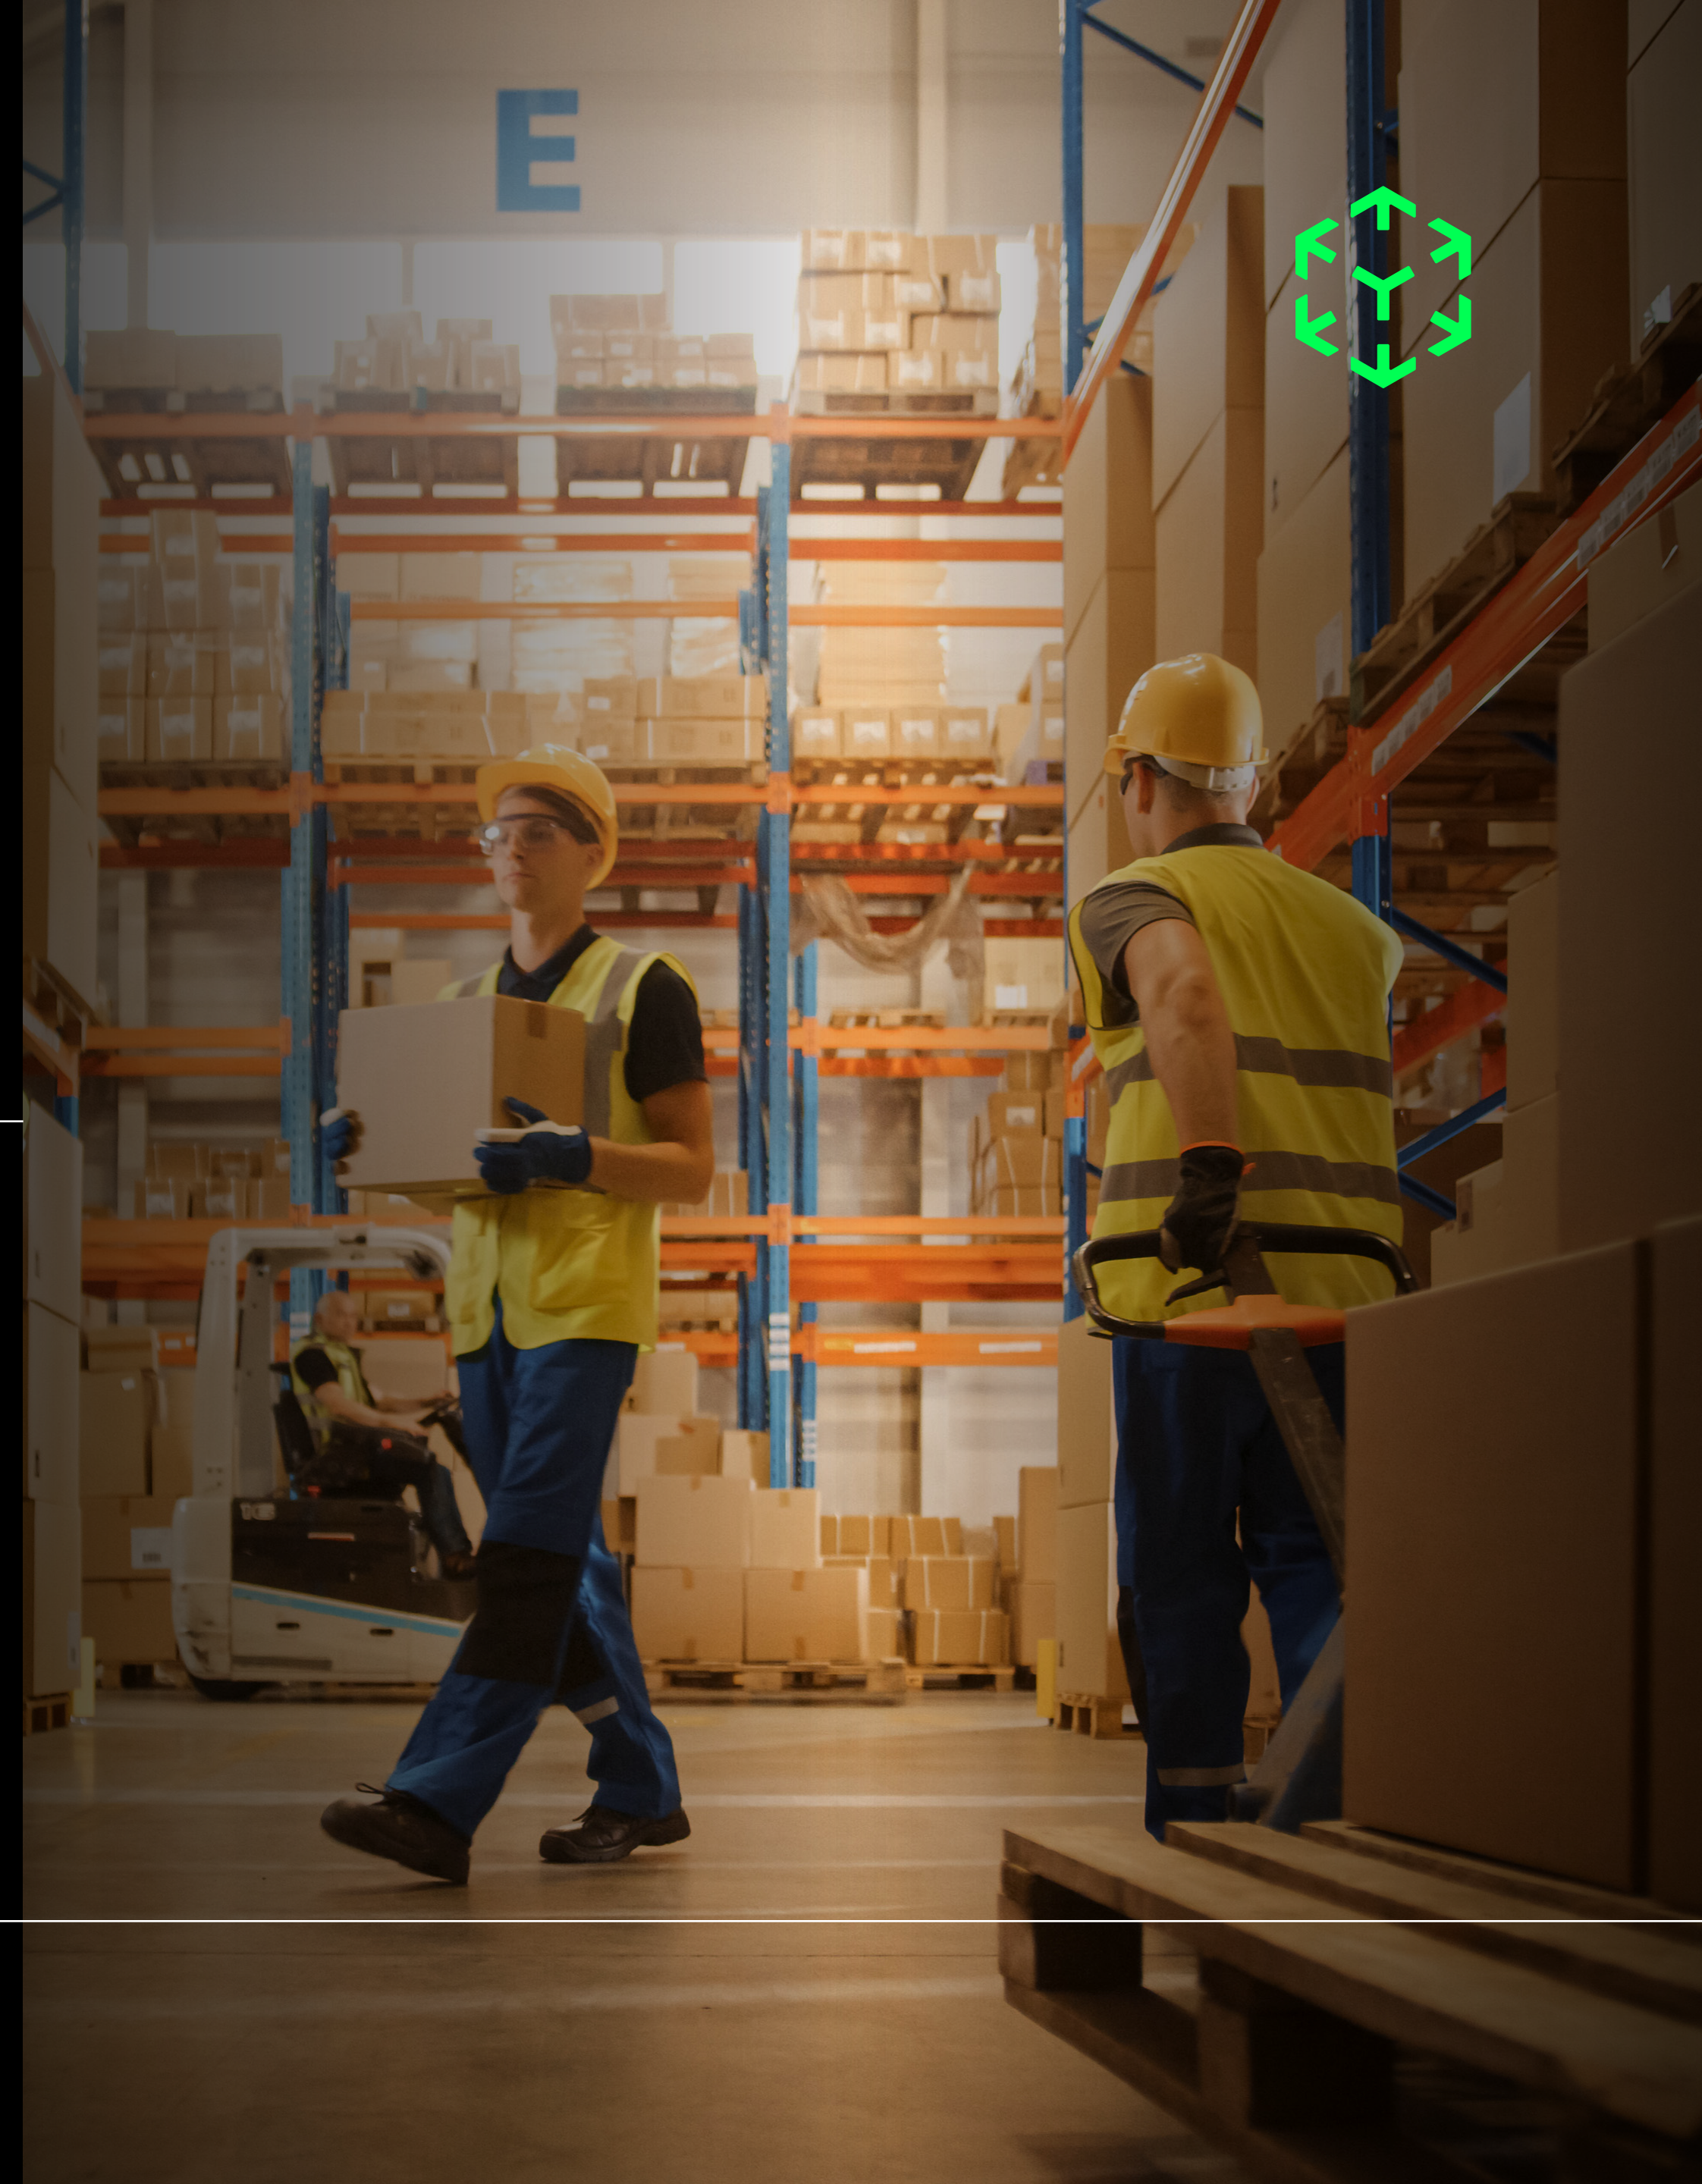

ABOUT *PROLOGISTICS*

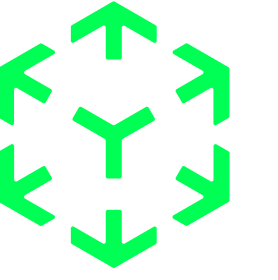

Facility Highlights

- Optimized layout for high-throughput operations and minimal turnaround time
- Segregated storage for dry, air-conditioned, chilled, and frozen products
- High-density racking systems for scalable warehousing
- Fully temperature-controlled environments compliant with industry regulations
- 24/7 operations supported by a robust warehouse management and security system

Core Services

- Goods receiving and unloading
- Flexible storage and inventory control
- Order fulfillment and distribution
- VAS: kitting, labeling, repackaging
- Returns processing
- Local distribution and delivery

MISSION

To deliver innovative, reliable, and sustainable logistics and warehousing solutions customized to the unique needs of our clients. At PROLOGISTICS, we are committed to optimizing supply chains, enhancing operational performance, and delivering excellence, while embedding eco-conscious practices at the heart of everything we do.

& VISION

To redefine logistics and distribution through technology, sustainability, and client-centricity, emerging as a regional leader in custom, intelligent supply chain solutions. We envision a future where efficiency, flexibility, and environmental responsibility drive global trade and logistics forward.

OUR **CORE VALUES**

- **Customer Focus**

We prioritize our clients' unique goals, delivering tailored and proactive service.

- **Innovation**

We embrace cutting-edge technologies to enhance performance and precision.

- **Integrity**

We uphold honesty, transparency, and ethical practices in every engagement.

- **Safety & Security**

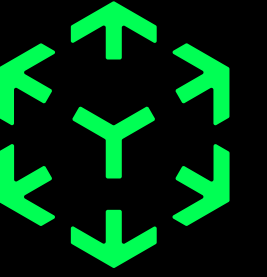

We foster a culture of safety for people, products, and processes.

- **Teamwork**

We collaborate cross-functionally to drive unified success.

- **Continuous Improvement**

We constantly evolve through data-driven insights, learning, and agility.

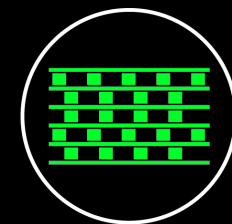

STRUCTURE

Our facility features a 24-meter central ceiling height and specialized racking systems (very narrow aisle and selective) for optimal storage density. A thoughtfully engineered layout segregates inbound and outbound flows, enhancing process efficiency and minimizing operational friction.

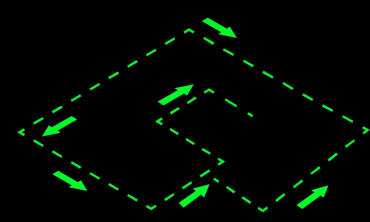

20+ Fleet Vehicles,
rigorously maintained for
operational excellence

43,000+ Pallet Positions
across dry, AC, chilled, and
frozen storage zones

100+ Logistics Professionals
with deep sector expertise

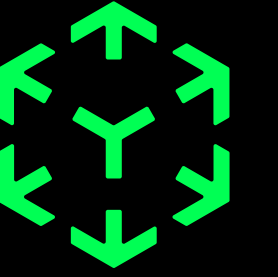

30,000+ m² Built-Up Area,
part of a 36,000 m² land plot
in Tebna

RACKING SYSTEMS

RACKING *SYSTEMS*

We offer a diverse range of premium steel racking systems—engineered for flexibility, load optimization, and scalability.

From cost-effective models to high-end, custom installations, our team handles everything from design to full setup. These solutions empower clients to maximize storage efficiency while maintaining high throughput.

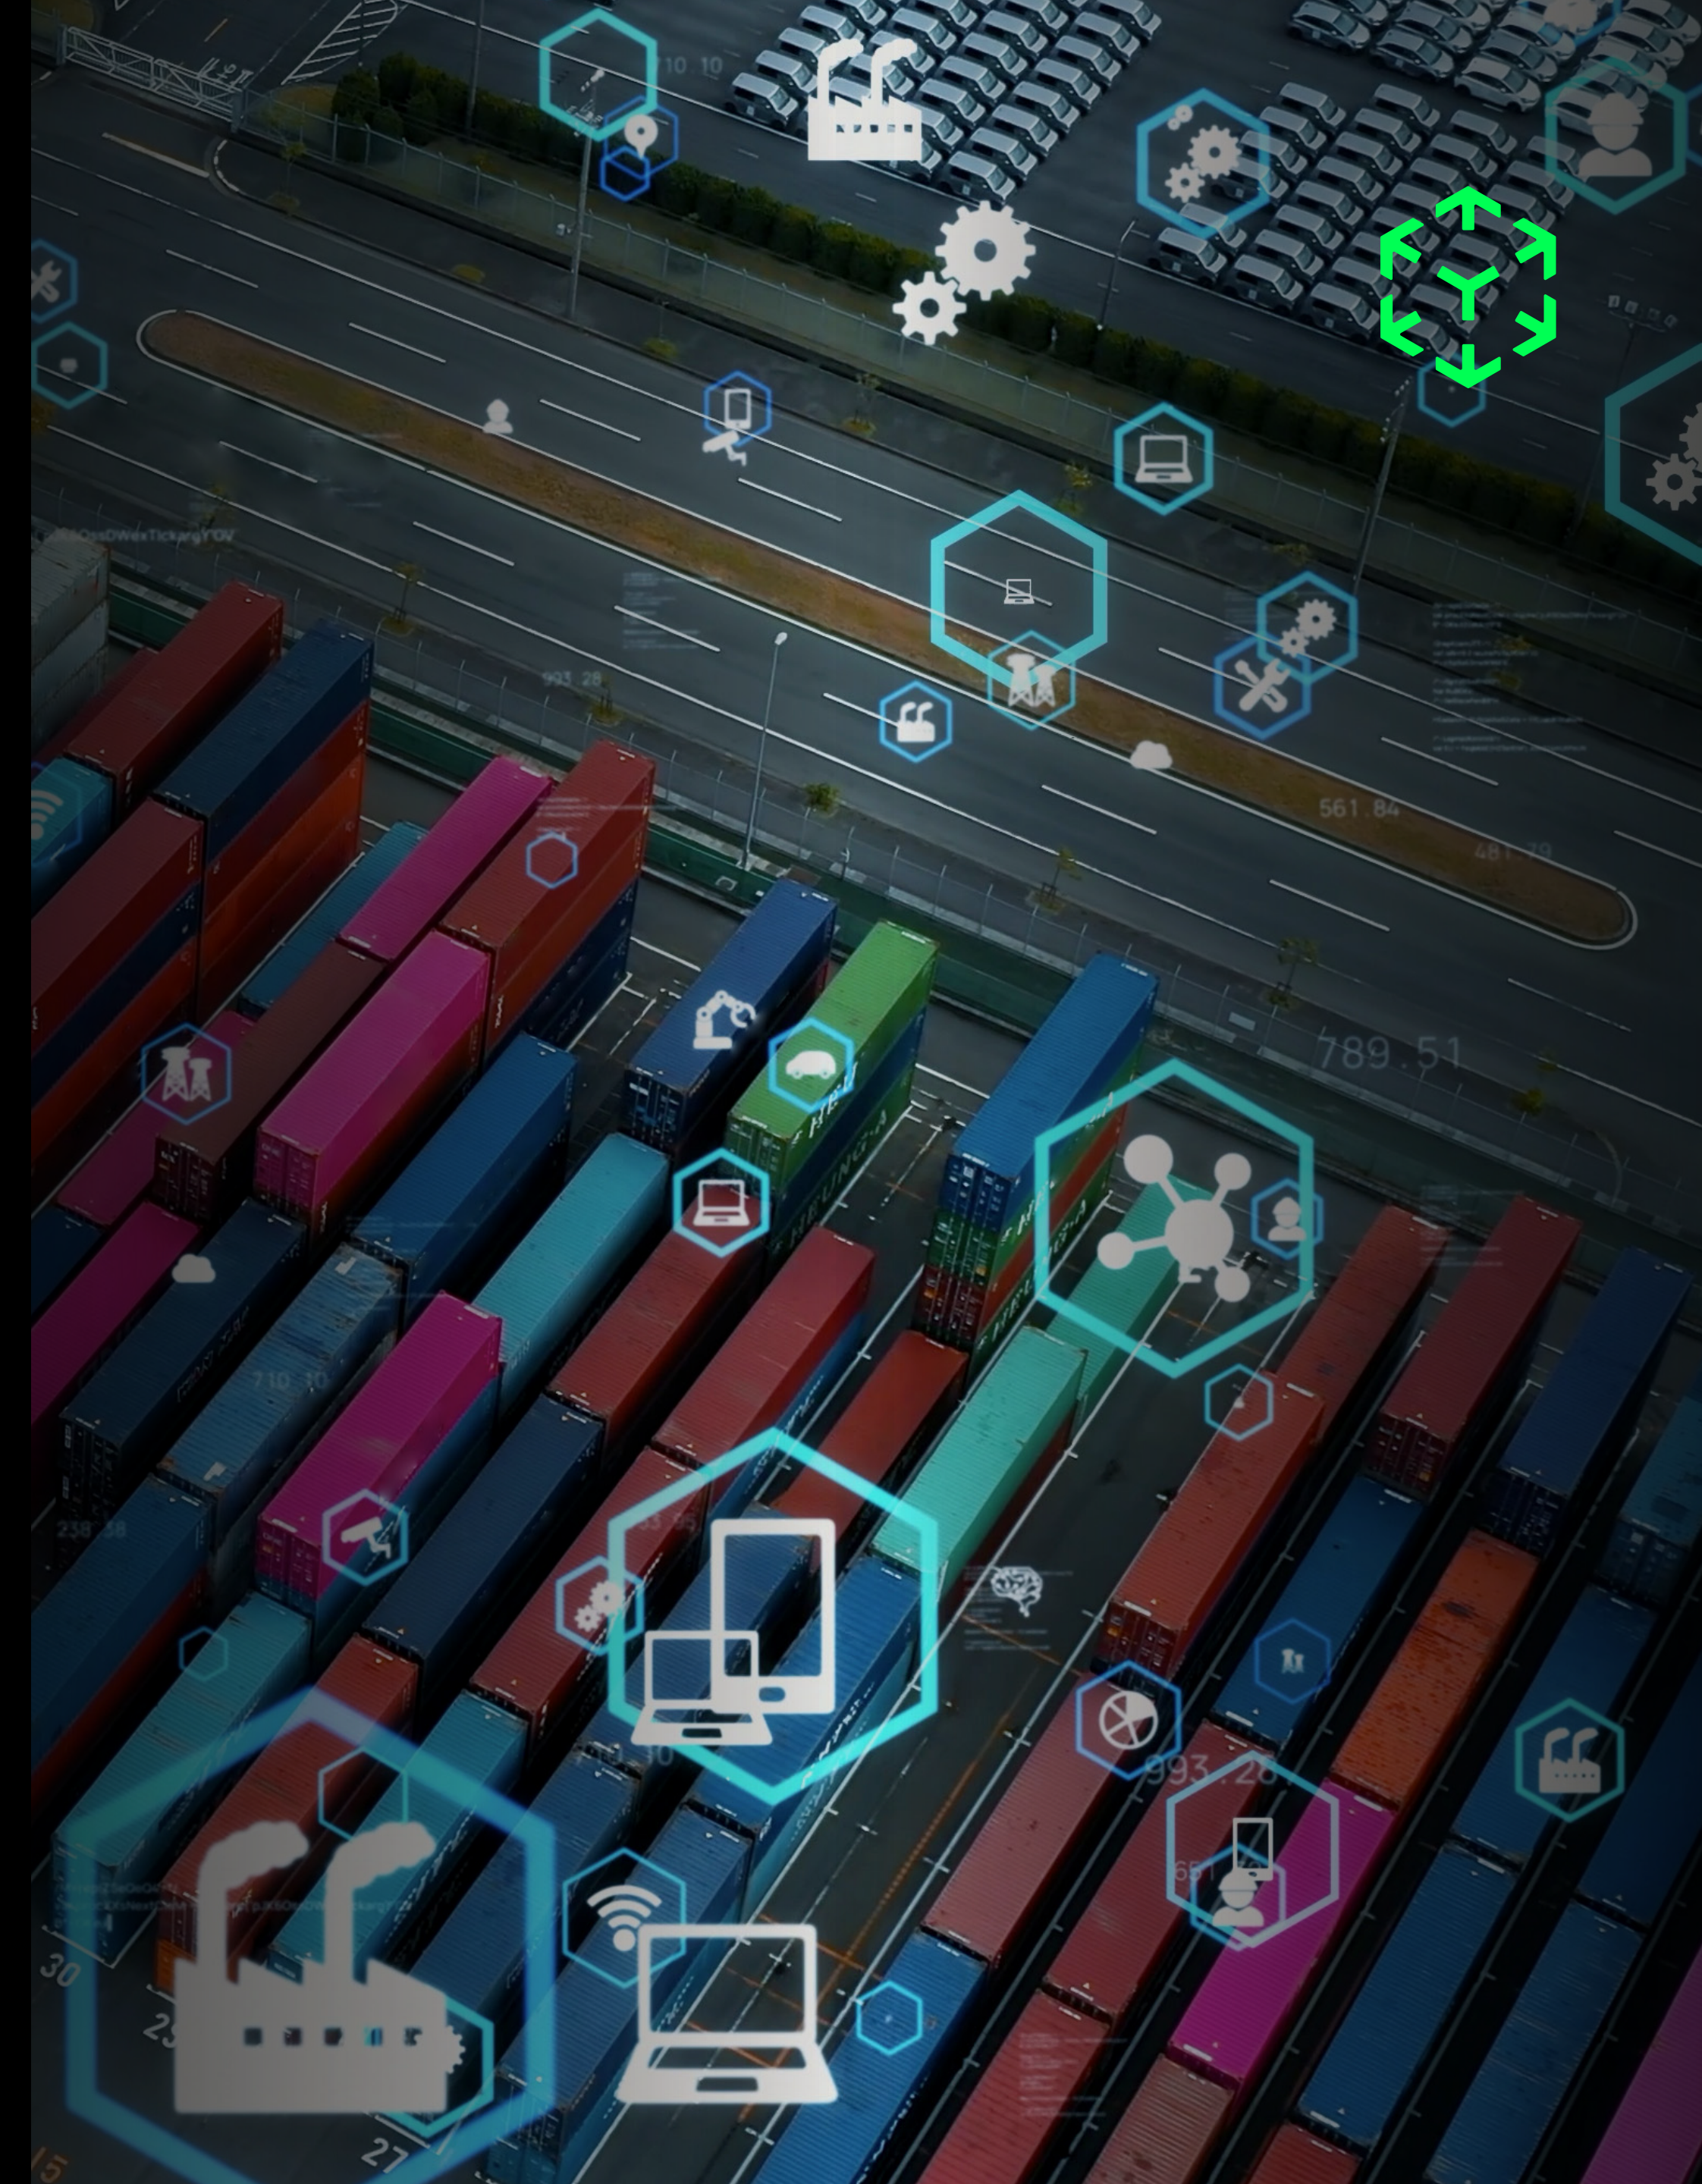

MATERIAL **HANDLING EQUIPMENT:**

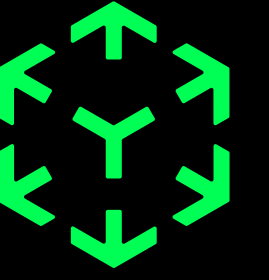

OUR FLEET INCLUDES:

- Forklifts for pallet movement
- Reach trucks for narrow aisles
- Pallet jacks for short-distance transfers
- Conveyor systems for automated sorting and transit

SAFETY PROTOCOLS:

- Operation limited to trained and authorized personnel
- Adherence to strict load capacities and equipment specifications
- Daily inspections for wear, damage, or malfunction
- Regulated operating speeds for safety
- Preventive maintenance programs

MATERIAL *HANDLING EQUIPMENT:*

Our investment in advanced MHE ensures seamless handling of all product types regardless of size, weight, or storage needs.

Electric Counterbalance truck

- Lifts up to 4.5 meters
- Capacity / load: From 1.30 to 2.00T

Electric Reach Truck

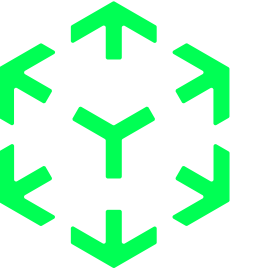

- Lifts up to 18 meters
- Capacity / load: From 1.00 to 1.6T

VNA Electric Sideway Seated

- Lifts up to 14 meters
- Capacity / load: From 1.00 to 1.6T

WAREHOUSE-SORTING CONVEYOR

To accelerate operations, our automated conveyor system links multiple picking zones to the loading area. Barcode scanning at the conveyor's end enables automated sorting, boosting productivity and precision.

Key Benefits:

- Increased processing speed and reduced manual effort
- Enhanced workplace safety
- Optimal space utilization
- Real-time inventory movement tracking
- Higher order fulfillment accuracy

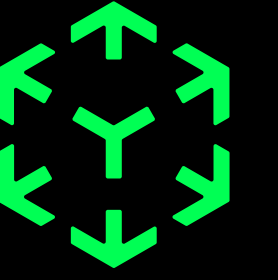

WAREHOUSE-SORTING CONVEYOR

All warehouse operations, from inbound to outbound, are managed by Microsoft Dynamics AX, enabling real-time visibility, accuracy, and control.

SYSTEM CAPABILITIES:

- Fully integrated inbound, picking, packing, and outbound management
- Seamless ERP integration
- Customizable client workflows
- Real-time data access
- Accuracy in inventory, picking, and fulfillment

REFRIGERATION ***SOLUTIONS***

With a specialized team and deep technical expertise, we offer turnkey refrigeration solutions for commercial and industrial facilities.

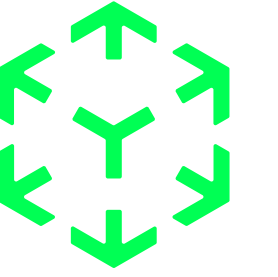

Our integrated approach, combining design, installation, and maintenance of both cooling and non-cooling systems, delivers a unique, all-in-one solution to clients across the region.

SUSTAINABLE *ENERGY*

Pro logistics has designed its facility to be an environmentally friendly Green Building, with sustainable features aimed at reducing its environmental impact and carbon footprint such as:

- LED lighting systems to lower energy use
- Insulated walls and roofing for optimal thermal regulation
- 1 MW solar energy generation via 1,700 rooftop panels
- Rainwater harvesting for non-potable applications
- Active waste recycling and reduction
- Eco-friendly transport planning to reduce emissions

LOCAL ***DISTRIBUTION***

Beyond warehousing, our local distribution services ensure fast, reliable delivery throughout Lebanon. Whether for SMEs or large corporations, we customize our transport solutions to meet evolving client and industry demands. Our tech-integrated approach guarantees real-time visibility and service reliability.

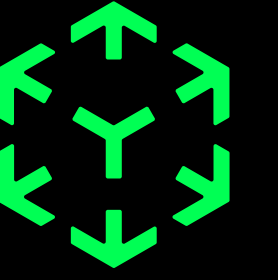

QEHSS

We integrate **Quality, Environmental, Health, Safety, and Security (QEHSS)** standards into every facet of our operations. Our commitment ensures:

- A safe, secure workplace
- Eco-conscious operations
- Regulatory compliance
- Superior service delivery
- Social responsibility

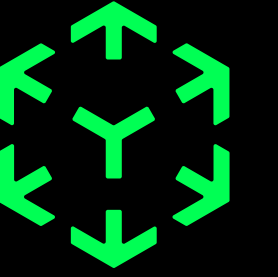

LEARNING & *DEVELOPMENT*

We believe our people are our greatest asset. Our culture promotes continuous growth through structured training, upskilling, and leadership development programs. This commitment enhances our service capabilities, nurtures talent, and cultivates loyalty and innovation.

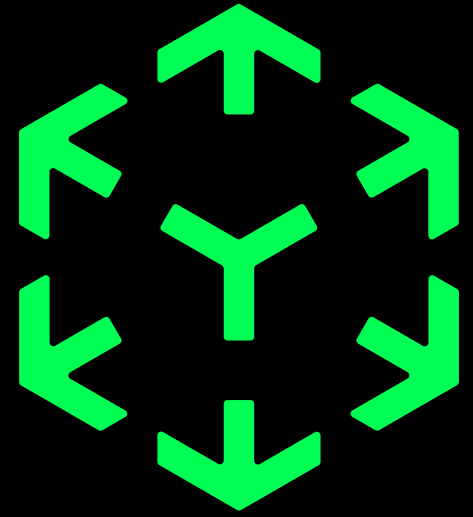

WHY CHOOSE US

Entrusting your supply chain to PROLOGISTICS means partnering with a team driven by excellence, innovation, and accountability.

OUR STRENGTHS INCLUDE:

- Proven expertise in complex logistics
- Custom risk mitigation strategies
- Real-time tech integration and full visibility
- Scalable solutions aligned with your growth
- Transparent, client-first service culture

**LET PROLOGISTICS BE
THE ENGINE BEHIND YOUR
LOGISTICS TRANSFORMATION.**
